

# Vernal Pool Ecology Field Trip

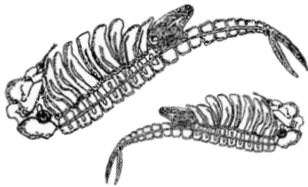

## Interested in learning more about vernal pools?

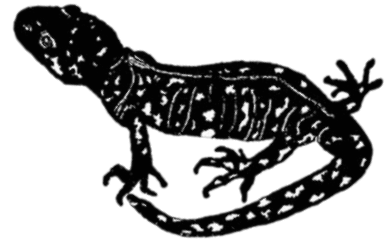

- The secretive animals that breed in them and their life histories?
- How to identify amphibian egg masses?
- The hydrology and ecology of these unique little wetlands?
- And the broader role they play in our forested landscapes?

If so, please join us for a field trip hosted by the Craftsbury Outdoor Center on:

**May 11<sup>th</sup>, 2019**  
**9 - 11 am**

We will meet in the main parking area at the Craftsbury Outdoor Center and either walk or carpool to a nearby pool. Please dress appropriately for whatever the weather has to offer: mud, bugs, rain, or snow.

Led by Dawn Morgan, wetland ecologist with 15 years of experience with vernal pool research, conservation planning, policy, outreach, mapping, and monitoring projects.
